K. Scharnhorst: *A Grassmann integral equation.* Journal of Mathematical Physics **44**(2003)5415-5449 [arXiv:math-ph/0206006] (DOI: 10.1063/1.1612896).

Misprints, errata, addenda:

- On p. 5421, the indices l and m on the r.h.s. of the eqs. (31)-(33) should be interchanged. The equations should read correctly:

$$\mathsf{P}^{(2n-2k)\star}_{LM} = \frac{\partial}{\partial A^{(2)}_{m_1,l_1}} \cdots \frac{\partial}{\partial A^{(2)}_{m_k,l_k}} P \tag{31}$$

$$= (-1)^k \frac{\partial}{\partial \eta_{m_1}} \frac{\partial}{\partial \bar{\eta}_{l_1}} \cdots \frac{\partial}{\partial \eta_{m_k}} \frac{\partial}{\partial \bar{\eta}_{l_k}} Z[\{\bar{\eta}\},\{\eta\}]\Big|_{\bar{\eta}\,=\,\eta\,=\,0} \tag{32}$$

and

$$\mathsf{P}^{(2n-2k)\star}_{LM} = \frac{\partial\ \mathsf{P}^{(2n-2k+2)\star}_{LM}}{\partial A^{(2)}_{m_k,l_k}} \tag{33}$$

Also, on p. 5443, the indices l and m on the r.h.s. of eq. (A.2) should be interchanged. The equation should read correctly:

$$C^{\,n-k}\,(\mathsf{B})_{LM} = \frac{\partial}{\partial \mathsf{B}_{m_1 l_1}} \cdots \frac{\partial}{\partial \mathsf{B}_{m_k l_k}}\ \det \mathsf{B} \tag{A.2}$$

- On p. 5438, the eqs. (190), (191) should read correctly:

$$G\,'(s) \sim \frac{1}{\sqrt{s}} \tag{190}$$

and

$$G(s) \sim \sqrt{s} \tag{191}$$
